SUSTAINABLE MANUFACTURING

Our processes of selection and handling of raw materials, and the production of our rest equipment made with **sustainability criteria**. Are respectful with the environment. The idea is to minimize the environmental impact by **saving energy and natural resources** contributing to the **circular economy**.

A LIFETIME...

More than 30 years of work have allowed us to live multiple and different experiences. But above all, we found the best solutions for the rest.

DENOI is born, a mattress factory with its beginnings rooted in a family furniture manufacturing company dating back to 1956.

1990

We begin manufacturing with the **tapa tapa** system. It's the first machine in Spain with this system.

1995

We develop and adapt an **ultrasonic machine** to apply 3D and decorative belts to sealed mattresses, becoming global pioneers.

2004

1991

We purchase the **Bonnell spring** machine, which was then in vogue. Only a few in Spain had this technology in their facilities at the time.

2002

Installation of the first **high-speed sealing line**.

MADE
FOR YOU

...DEDICATED TO REST

2007

Our **CONTRACT** department is born. In just a few years we consolidate our position in the hotel market, installing more than 15,000 beds a year in hotels all over the world.

2009

We obtain our first quality seal, **Denoi Quality Control**.

2012

We incorporate our first **pocket spring machine**.

2016

A new pocket spring machine with a **millennial system**, a casing with perimeter steel reinforcement, unique in Spain.

2019

The DANA hits Orihuela, more than 500 litres/metre fall in a very short period of time. New facilities are acquired to start up a **world-leading environmental project**.

2022

Our R&D department develop a new machine: **TOTAL AIR SYSTEM**, a uniquely designed air valve system.

A close-up, slightly blurred photograph of an industrial sewing machine in a factory. The machine is white and grey, with various dials and buttons on its top panel. Blue cables are connected to the machine. The background shows other industrial equipment and a factory floor.

Tailor-made rest for your customers

Make your guests feel at home and increase your number of reservations.

The added value for travelers that gives visibility to your property and increases the number of reservations. Only by flipping the mattress can you change the comfort level of the rest equipment. Make your guests feel at home, and increase your number of positive reviews.

***ADAPTABLE TO ALL MODELS OF DENOI MATTRESS.**

PROVEN EXPERIENCE

With over 30 years of experience, our facilities are equipped with the latest generation machinery where it carries out the necessary processes to obtain a product of total warranty and maximum quality.

Our constant technological innovation, training and updating of procedures enables us to offer any special design ensuring a quick service.

DENOI MATTRESSES DONATE TISSUE FOR MORE THAN 140.000 MASKS, 150 MATTRESSES AND PILLOWS FOR THE FIGHT AGAINST COVID-19 IN THE HOSPITAL GÓMEZ ULLA IN MADRID

The Alicante company Denoi Mattresses, dedicated to the manufacture of rest equipment, with high performance, based in Orihuela, has donated the meters of fabric TNT necessary for the production of about 140,000 masks, in addition to 150 mattresses and pillows that serve to hospitalize patients in the Hospital in Madrid Gómez Ulla.

The goal is to relieve the situation occurring in our country by the impact of the Coronavirus” and provide the material necessary for the protection of personnel exposed to the infection, and hospitalization of

patients suffering from the virus with greater severity.

The masks will be made by volunteers with textile, non-woven fabric (TNT), especially dedicated to the manufacture of wearing high performance, and will be the local agencies that are responsible for distributing them among the different social agents.

The mask will provide protection in the Hospital Vega Baja, Orihuela, Reina Sofía of Murcia, Quirón Torrevieja and Lorenzo Guirao in Cieza, and will protect the officials and security forces in the city hall of Orihuela.

The satisfaction of solidarity

Once more, Noi Furniture European SLU, a company dedicated to the manufacture of rest equipment from high-performance sympathies in order to contribute to the population help in crisis situations. “It is comforting to be able to help with our materials and products in this health crisis”.

Mattresses Denoi is located in Orihuela (Alicante) and has over 30 years of experience in the industry providing mattresses and accessories, homes, nursing homes and hotels around the world. All of them with a selection of materials and quality controls that allows them to respond to the different regulations of the guarantee of each country.

SOLUTIONS THAT FALL IN LOVE

Every place has its charm, so it's critical to have a high capacity for adaptation and flexibility to the demands of the traveler. The DENOI CONTRACT rest equipment suits any need to satisfy the most demanding guests.

SUITE DOBLE TOP

Top quality Mattress made with the selection of the best materials. Its system of independent springs represents the rest for excellence. The combination of springs with visco-elastic allows you to flip the mattress, obtaining the same comfort on both sides.

The background is filled with large rolls of white material, likely fabric or paper, stacked on pallets. The factory has yellow metal structures and overhead lighting.

“We are a young, dynamic company, feisty and innovative always working to improve working to improve. We are a great team of professionals, and it is lucky because we make a great team of people who struggle to improve day-to-day. Comforts us to know that we are providing a necessary product for the welfare of the people”.

MONSE. Purchasing department.

**VISCO
CARBONO⁺**

HELPS NIGHT TO LIVE A BETTER DAY

COMFORT AND BREATHABILITY

The main benefits of the Visco Carbon are its high breathability and the ability to eliminate odors by absorbing the odor caused by sweating. Also, it has a great ability to repel dust and all kinds of harmful substances, preventing the formation of mold and bacteria as a result of the sweat and the habitual use of the mattress.

THERMAL REGULATION

The incorporation of the Visco Carbon to the mattress makes the contact area in a hyperconductive space capable of processing high doses of heat flux, allowing a break without accumulation of temperature

QUALITY, HYGIENE AND RELAXATION

The Visco Carbon has the ability to absorb static electricity from the human body, facilitating relaxation and providing the relaxation and rest that the body needs.

"The DENOI technological evolution has been fascinating... in The beginning it was all very manual. Since then, the evolution in technology processes has been spectacular. Thanks to this, we are a very "feisty" company and with great adaptability to all circumstances that mark the market".

MANU. Production Manager

ViscoGel

Maximum adaptability, dissipating heat and providing the best comfort

Viscogel is a compound that incorporates gel particles injected into the memory foam, providing greater flexibility and elasticity. Dissipates heat due to their porosity and gel in cold injections, increasing the feeling of freshness.

It has a higher density than the conventional foam, which allows for greater mobility and adaptability, reducing pressure points and optimizing the distribution of the weight.

A perfect material for any age and weight. Improves the durability of the mattress or rest equipment.

VDA

Increased breathability and durability

VDA is an aeration valve system that provides the breathability necessary for the internal materials of the mattress to improve durability and eliminate body moisture generated during the night.

The **aeration valves or aerators**, are small valves that are located on the sides of the mattresses and allow a good aeration of its interior. The effect of the valves or aerators favors perspiration throughout the structure and prevents moisture concentration thus contributing **to improve rest and extend the life of your mattress.**

All our mattresses comply with the regulations of IGNITION OF MATTRESSES and upholstered bases IN 597-2 AND THE 597-1 against cigarettes in combustion, and matches. This certification gives the ability to not ignite such sources of heat.

**We keep on thinking
about you.**

SOLUTIONS OF PROFESSIONAL REST EQUIPMENT FOR HOTELS AND NURSING HOMES

We manufacture mattresses, supports and complements for the rest of superior quality. High production capacity, modeling and personalization of custom-made products. The selection of materials and the quality control that we impose on our production allows us to respond to the different regulations of the guarantee of each country. DENOI, high-performance rest equipment with a guarantee of immediate replacement.
